Joanne,

We are currently managing and still considering this site as an emergency versus time-critical or non-time critical. Attached is a copy of the G2G letter. I did talk with the Solid Waste Manager for the Yakama Tribe today and she is serving as the coordinator on behalf of the Tribe to coordinate with the Tribal Council. I asked her about managerial levels and so she is checking with the Tribal Council regarding this question.

Thanks for answering my question today.

Calvin

Subject: Ashue Road Asbestos - G2G Yakama Nation

Hi Jeff,

Calvin just stopped by and let me know the Yakama Nation are interested in G2G consultation regarding Ashue Road Asbestos site in Wapato, WA. I was going to send JR Herbst a copy of signed letter/offer we sent to Yakama's. Do you have a copy?

Also, not sure if this is considered a non-time critical removal action and therefore falls within normal G2G processes (versus emergency or time-critical response). This may affect the time and who attends consultation meeting. Joanne
